Social Determinants of Health

Insights from a meta-analysis of recent anthropological studies

Anita Hardon
INDEPTH, Accra
20th March 2013
Meta-analysis anthropological research

Various possible approaches and no gold standard

Our approach:

• Basic data extraction (aims, theoretical framework, methods, key findings etc)
• Emergence of key themes (inductive)
• Mapping: cross-comparison of key themes
• Interpretive and aggregative
• Consultation with stakeholders
Scope of the synthesis

- Youth sexual and/or reproductive health
- Since 2000
- 20+Doctoral theses
- 6 comparative SRH studies
- AISSR and collaborating centres
- Focused literature review

- Sub-Saharan Africa and Asia
- Diverse research topics and questions
- More and less applied studies
- Different theoretical orientations
- A range of methods

- Key insights
- Implications
Approach

- Focus on process
- Emic point of view
- Observation of practice
- In context
## HIV/AIDS prevention

<table>

<td>Young people (15-25 yrs) who worked/lived/hung-out at the street corner – esp. young men</td>
<td>PObs, informal interviews, FGDs</td>
</tr>
<tr>
<td>Reid, G. (2007). How to be a real gay.</td>
<td>Small town, Mpumalanga province, South Africa.</td>
<td>&quot;ladies&quot; and to a lesser extent &quot;gents&quot; - gay men</td>
<td>Pobs, IDIs, informal</td>
</tr>
</tbody>
</table>
Analytical concepts

Individual → Socialities/Networks
Attributes → Relations
Determinants → Mechanisms
Structural disadvantage → Agency/navigation
Past Present → Social becoming/future
- Participant observation
- Informal conversations
- In-depth interviews
- Semi-structured interviews
- Life histories
- Free listing & pile sorting
- Body mapping
- Focus group discussions
- Embedded open question
- Diaries
- Audio-visual techniques
- Projective techniques
Change

- Globalization
- Urbanization
- Feminization of workforce
- Commodification
- Civic engagement
Change: new youth socialities

- Change in gender-power relations
- Rise in SRH support groups
- Increasingly technologically mediated
Change: new modes of masculinity

- Dhaka - Bangladesh
- Kazol married an HIV-positive woman and cares for her
- *Expresses valo manush*: Responsibility and care towards his family and society (*Saikh 2012*)
New kinds of risks

กรุณทรำแล้วคร ลำบับ หนังสกินดอนนี้ เล็กๆน้อยๆ พิษส 닭ไข่ ใกล้กันนั้นเด็กกันครับ เล็กๆ เรือน่าๆ คุณกัน มีปะป ดู
หนังสกินดอนนี้

**Always Safer Sex**

ก็แค่อยากกินโต้เต็มเยี่ย เยี่ยม มะดีไหมคับ!! บอกหน่อย ย นะ
Mechanisms: non–use of condoms

Limpopo
Self-organized love-life sessions

Condoms do not fit the relational norm of *ubuntu* (sharing) of love and bodily fluids
(Oxlund 2009)
Dual Protection

The back of the sachet reads:

*For comfort and to prevent bacteria, wipe genitals with Super Magic Man wet tissue and leave it there for 15 minutes. Super Magic Man effectively refreshes and cleans the skin, increases sexual potency and prevents premature ejaculation.*
Mechanisms: non use of contraceptives

Cameroon
- Women looking for big fish
- They use pregnancy strategically
- (Van der Sijpt 2011)
PAMPA REGLA
1-2 Months Delay
W/ HERBAL CAPSULE
1/3 SA BASO
3 BESES MAGHAHON
BAGO KUMAIN
BAWAL ANG MALAMIG
AT MAASIM
Mechanisms: acceptability of HIV testing

- Respondents prefer ‘routine’ testing
- When tested at home: 7 out of 10 tested with their partners
- Most respondents considered their own homes as more private than health facilities.

Mechanisms: grass roots economics

Young boys under pressure to give presents, and exchange comes with expectation of sex

(Tadele 2005; van Reeuwijk 2009 and Oxlund 2009, Bochow 2012)

Life-skills/peer program valued as income, more income → more unsafe sex

(Blommaert 2012; Verheijen 2012)

“I have loved you for a long time. Today is the day I want you to be my lover. What do you say?”

“I also love you. Because you are handsome. Also your father has a car, at my home we only have a bicycle.”
Navigating local moral worlds

• Girls’ sexuality is hidden, experimentation not accepted (van Reeuwijk 2009, Koster 2003, Bochow 2012)

• Youth SRH events threaten family honour (van der Sijpt 2011, Oosterhoff 2008, Huong 2011)

• Aunties, older siblings discrete advice and support
Ulfa: public purity – private pleasure
Implications for research on social determinants

1. Go beyond individual attributes
2. Be aware of hidden practices and emic perspectives
3. Take into consideration dynamics of change
4. Use mixed methods
