I would like to start by asking you some background questions before asking you questions about your health. This information is confidential and you will not be identified individually or without your consent.

One of the issues we are exploring in this study are the memory problems that some older persons can have. I know these questions may be sensitive or difficult to answer, but please try to provide an answer. I would like to start by asking you two questions about your memory.

**Q1003**

**How would you best describe your memory at present ?**

1. VERY GOOD

2. GOOD

3. MODERATE

4. BAD

5. VERY BAD

**Q1004** Compared to a year ago, would you say your memory is now better, the same or worse than it was then?

1. BETTER

2. SAME

3. WORSE

**Q1005** INTERVIEWER:

1. NO REASON TO THINK RESPONDENT HAS ANY COGNITIVE LIMITATIONS .....→

2. RESPONDENT MAY HAVE SOME COGNITIVE LIMITATIONS BUT COULD PROBABLY DO THE INTERVIEW .....→

3. COGNITIVE LIMITATIONS, PROXY .....→

**FOR PROXY**

Now we want you to remember what your friend or relative was like 10 years ago and to compare it with what he/she is like now. Ten years ago was in 1995. Below are situations where this person has to use his/her memory or intelligence and we want you to indicate whether this has improved, stayed the same or got worse in that situation over the past 10 years. Note the importance of comparing his/her present performance with 10 years ago.

For example, if 10 years ago this person always forgot where he/she had left things, and he/she still does, then this would be considered "not much change".

*INTERVIEWER: can show the respondent the scale and read the categories..*

**Section 2000: Health State Descriptions**

Time Begin:   :

Now we will switch to questions specifically about your health. The first questions are about your overall health, including both your physical and your mental health.

<b>Q2000</b>	<b>In general, how would you rate your health today?</b>	1 Very good
		2 Good
		3 Moderate
		4 Bad
		5 Very bad
<b>Q2001</b>	<b>Overall in the last 30 days, how much difficulty did you have with <u>work or household activities</u>?</b>	1 None
		2 Mild
		3 Moderate
		4 Severe
		5 Extreme/cannot do

Now I would like to review the different functions of your body. When answering these questions, I would like you to think about the last 30 days, taking both good and bad days into account. When I ask about difficulty, I would like you to consider how much difficulty you have had, on average, in the last 30 days, while doing the activity in the way that you usually do it. By difficulty I mean requiring increased effort, discomfort or pain, slowness or changes in the way you do the activity. Please answer this question taking into account any assistance you have available.

**VIGNETTES FOR HEALTH STATE DESCRIPTIONS**

This next section will require additional concentration. I will read to you some stories about people with varying levels of difficulties in different areas of health. I want you to think about these people's experiences as if they were your own. Once I have finished reading each story, I will ask you to rate what happened in the story. I would like to know how you view each story and rate how much of a problem or difficulty the person described has in that area of health in the same way that you described your own health to me earlier. While giving the rating, think of the person in the story as someone who is of your age and background.

**Set A Affect and Mobility**

	[Yusuf] is able to walk distances of up to 200 metres without any problems but feels tired after walking 1 kilometre or climbing up more than one flight of stairs. He has no problems with day-to-day physical activities, such as carrying food from the market.

**Section 2500: Anthropometrics and Performance Tests**

Time Begin:   :

Before we ask you more questions, this time about your own health and well-being, we would like to measure a few things, like your blood pressure, your weight and height. We'll also ask you to participate in a few tests to determine your health status.

**Blood Pressure**

	<b>First I would like to measure your blood pressure (seated x 3, after 1 minute rest)</b>

**INSERT BLOOD TESTS HERE.**

**Continue with Performance tests, see Appendix C.**

**INTERVIEWER: you will start with the walking tests - using your tape measure, mark out lengths of 1 and 4 metres over a flat and straight surface.**

**Normal walk**

Now I am going to observe how you normally walk. If you use a cane or other walking aid and would be more comfortable with it, then you may use it. This is the walking course. I want you to walk to the other end of the course at your usual speed, just as if you were walking down the street to go to the store. Walk all the way past the other end of the tape before you stop. I will walk with you.

Other than activities that you've already mentioned, I would like to ask you about the way you travel to and from places. For example to work, for shopping, to market, to place of worship.

Q3025	<b>Do you walk or use a bicycle for at least 10 minutes continuously to get to and from places?</b>	1. YES 2. No .....→	Q3028
Q3026	<b>In a typical week, on how many days do you walk or bicycle for at least 10 minutes to get to and from places?</b> <input type="text"/> <input type="text"/> DAYS		
Q3027	<b>How much time would you spend walking or bicycling for travel on a typical day?</b> <input type="text"/> <input type="text"/> : <input type="text"/> <input type="text"/> HOURS:MINUTES		

The next questions ask about activities you do in your leisure time. Think about activities you do for recreation, fitness or sport. Do not include the physical activities you do at work or for travel mentioned already.

Q3028	<b>Does your [recreation, sport or leisure time] involve mostly sitting, reclining, or standing, with no physical activity lasting more than 10 minutes at a time?</b>	1 YES 2 No .....→	Q4001
Q3029	<b>In your [leisure time], do you do any <u>vigorous</u> activities like [strenuous sports like running or weight lifting] for at least 10 minutes at a time?</b>	1 YES 2 No .....	Q3032

<b>INTERVIEWER: The next section contains multiple parts and questions about the respondent's day - yesterday. Make sure you complete all parts of the respondent's morning (up to 10 parts) and all 3 steps (activities, feelings, sleep quality).</b>		
<p>Now I would like to ask you questions about what you did yesterday. I would like to know where you were, what you did, how long you did an activity and how you felt about doing that activity. I am not asking about your entire day, just the morning yesterday after you woke up.</p> <p>Please tell me about the different parts of your morning. I want you to think of a "part" of the morning as a period of time that lasted about an hour, maybe a little less, or maybe a little more, but generally not more than 2 hours where you were doing the same thing, or a series of similar things. Try to group small, routine things together.</p>

### CODING FOR Q7102

**INTERVIEWER:** For working, you may ask the respondent which kind of work it was. "Desk" means the person was mainly sitting at a desk. "Physical" means the person was mainly lifting or moving things. Check "Working (Other)" if neither is a good description of the nature of the work.

For "Going somewhere", you should use the appropriate specific code. Ask for clarification if it wasn't clear from the original answer. For example if respondent drove to work, ask if he or she was doing the driving, or if someone else was driving.

If several mundane things like grooming, preparing food, and helping children are mentioned as one part, then just code them as "Getting ready". If they are not mentioned in conjunction with other mundane activities, then code them individually.

If you're not clear on the category, you may suggest one or two categories and ask the respondent which of the categories is the best fit.

01 WORKING (PHYSICAL)	11 GETTING READY	23 TALKING WITH SOMEONE
02 WORKING (DESK)	12 GROOMING/DRESSING/ BATHING	24 WATCHING TV
